

# ENVIRONMENTAL POLICY STATEMENT

**At Millennium we understand the successful future of our business depends on sustainability of the environments, communities and economies in which we operate. As a supplier of cleaning, security and integrated services for businesses in Australia and New Zealand we recognise we have an impact on the environment, both directly from our operations and indirectly through our supply chain. The purpose of this Environment Policy is to create a framework for understanding and managing our direct and indirect environment impacts, risks and opportunities supporting our commitment to minimize our environmental impacts.**

**Millennium is independently certified to ISO14001:2015.**

Millennium ensures that:

- We purchase and use materials, substances and equipment that are environmentally friendly and minimise environmental impacts and the prevention of pollution in accordance with the ISO14001.
- In our workplace and through this Environmental Management System Policy Statement, we commit to comply with applicable legal requirements and other requirements that relate to our environmental responsibilities, while continually improving the effectiveness of our management system and the recycling of materials and substances with the aim to minimise waste contamination and increase the portion of waste to recycling and waste minimisation each year.

This policy statement provides the framework for setting and reviewing our planned environmental objectives and targets and is communicated to all persons working for Millennium and displayed for the general public and our stakeholders to view.

We regularly review and evaluate our activities to bring about better outcomes in our environmental performance.
